

BACK TO CAMPUS 2024

BE TRUE TO YOU

WIKI is a forum for the youth's vibrant self-expression and a celebration of their teen spirit. Through our ergonomically superior Back To Campus line, we foster vigour, assurance, and unwavering self-confidence within this impressionable age group and encourage these young and ever-curious minds to be true to themselves!

ERGONOMICS

In this day and age, students' backpacks are getting heavier and substantially bigger. This makes hauling and carrying these backpacks a strenuous episode for every kid while also affecting their developing body structure.

Backpacks by WIKI are ergonomically designed to protect and support a student's body while distributing the backpack's weight in a way that doesn't make carrying them, seem like a task.

FEATURES & BENEFITS

S-SHAPED SHOULDER STRAP

Adjustable straps that align with varying torso lengths & cause zero hindrance to users' arms

COMPRESSION STRAPS

Load compression for better alignment of the backpack with the body's centre of gravity.

COMFORTABLE SNUG FIT

Improves the stability of the backpack while the user is mobile while reducing stress development on the shoulders.

ORGANIZERS

Improves internal ergonomics of the backpack while keeping the contents of the bag organised.

EIRI 20UAD

Backet to fit females, specific needs
like shoulder straps, Waist Wings, s
complement the female frame. With
ergonomically superior backpacks
